

IPAM Innovation Leader

BT Diamond IP innovations make your IPAM processes simpler and easier without sacrificing flexibility and robustness

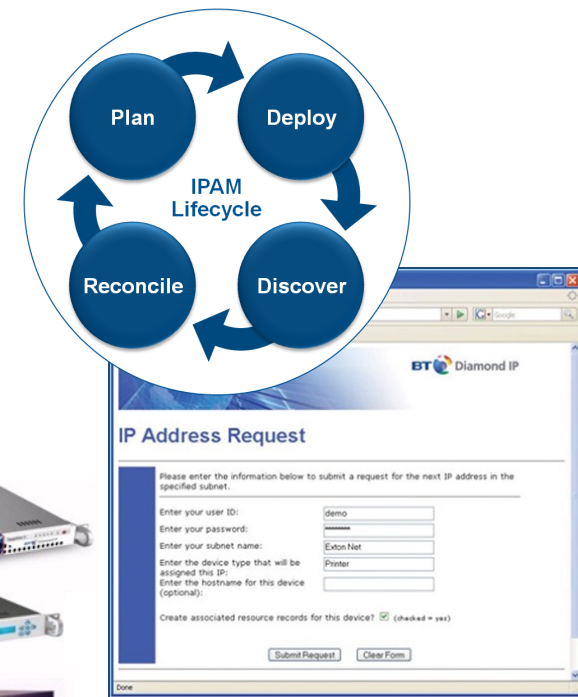

IPAM Challenges .. Solved!

If you're faced with any of the following challenges, BT Diamond IP can help!

- Manual tracking of IP subnet allocations in spreadsheets cause errors, duplicate allocations, delays and no accountability
- Multi-step manual processes for common IPAM tasks such as provisioning a subnet
- Multiple user interfaces requiring entry of common information multiple times
- Difficulty tracking who had a given IP address some time ago or who made a certain IPAM related change
- Lack of capital to upgrade IPAM practices or DHCP/DNS servers
- Reactive IP management with limited DHCP/DNS server monitoring or address utilization control
- Business initiatives driving deployment of advanced technologies such as IPv6 and DNSSEC
- Need to impose ITIL-like discipline on IP network management including IPAM functions
- Challenges upgrading software due to DHCP or DNS vulnerabilities on DHCP/DNS servers
- Network outages due to DHCP or DNS server misprovisioning, failure, or capacity issues

BT Diamond IP is the only IPAM provider offering IPAM solutions in your preferred format: appliance, software, virtual and managed service solutions that offer unsurpassed reliability, scalability and visibility for exceptional control over complex IP networks. BT Diamond IP supports the most common DNS/DHCP servers including Microsoft, BIND and ISC. This highly flexible and scalable solution enables companies to model, configure and manage their IP name and address space the way they want to, not according to rigid structures.

So BT Diamond IP? In short, we know IPAM
