

SECURE SOURCE DISTRIBUTION (M) SDN BHD

SECURE SOURCE DISTRIBUTION (M) SDN BHD

The Company

Secure Source Distribution (M) Sdn Bhd, a Value-Added Distributor (VAD), most dynamic and fastest growing I.T security distributor in I.T market. Dedicated, focused and delivered end-to-end network security products and solutions to the market namely Firewall, SSL VPN, Intrusion Prevention Systems (IPS), Endpoints, Data Loss Prevention (DLP), Email Security (Anti Spam & DLP), Web Application and Database Security, Security Information Event Management (SIEM), Network Access Control (NAC), DNS Security, Proxy and Web Content Security, Vulnerability Tools, Encryptions and Security Continuity and Redundancy. Secure Source works very closely with all their vendors, resellers and partners to meet mushrooming security demands in the market.

Founded in 2007, Secure Source is specializing in Network Security technology and solutions. As the market evolved swiftly and actively, the company has equipped with a team of dedicated, knowledgeable & experience resources to cater and meet the current and also future mission critical business challenges. Partnered with Security industry leading vendors such as Sourcefire, BT Diamond IP, Imperva, Proofpoint, Allgress, AlgoSec, Certes Networks, Netscout, Forescout, Elfiq Networks, BlueCoat, and IntruGuard. With these relationships, it has further enhanced Secure Source's advantage in this competitive marketplace. Secure Source is always stays at the fore-front of Security technologies. With a wise and clear focus of understanding of the ever-changing customer's requirements, the company has delivered the Security products, solutions and expertise that not only fulfill resellers and partners' needs, but also ultimately the end users' needs.

Our Visions

- A leading I.T Security Provider for End-to-End Network Security Solutions

Our Missions

- To provide best-of-breed Products, Solutions and Technologies
- To value and preserve our intellectual Properties

Our Values and Commitments

- Continuously deliver and maintain quality Supports and Services.
- Building strong channel infrastructure and facilities in supporting resellers and partners.
- To transfer knowledge, Skills and experience in a consistent manner.
- Dedicated, Proactive, Responsive, Courtesy and Professionalism are our key values and Commitments.
- Brings new Security Products & Technologies into market – “Best-of-Breed Solutions”

SecureCare and Services

With a group of dedicated, committed and experience expertise, Secure Source's technical support engineers are specifically equipped to deliver responsive support and technical assistance for all the security products and solutions.

Secure Source 24 x 7 x 4 support that guarantees our customers will immediately receive answer to any of their questions and concerns. Secure Source offers a variety of support and services designed to fit the various needs of our partners and customers. These options include:

- ◆ 8 x 5 x NBD
- ◆ 8 x 5 x 4hrs
- ◆ 24 x 7 x NBD
- ◆ 24 x 7 x 4hrs

SecureCare Key Benefits

Advanced Hardware Replacement

Trained specialists verify the source of your network problems by telephone. When hardware return is necessary, Secure Source ships a replacement unit to arrive at your site within the committed time frame.

Telephone Technical Support

Qualified technical support engineers help you resolve an unlimited number of incidents quickly and efficiently.

Software/Firmware Upgrades

Secure Source shall advise customer when new firmware is available and will assist to provide upgrades when necessary

SecureCare Maintenance Services

Secure Source offers 4 packages under SecureCare Maintenance Services that enable the customers the flexibility to select the plan that meets their needs.

	SecureCare Standard		SecureCare Premium	
	SecureCare 8 x 5 x NBD	SecureCare 8 x 5 x 4hr response	SecureCare 24 x 7 x NBD	SecureCare 24 x 7 x 4hr response
Response Time (Email, Phone and Remote Assist Support)	NBD	4 Hours	NBD	4 Hours
	From (9 am to 6 pm, Monday to Friday)		24 Hours	
Advanced Hardware Replacement	NBD	4 Hours	NBD	4 Hours
Onsite Preventive Maintenance	Optional		Optional	

CONFIDENCE WITH SECURITY Training

Secure Source Offers its customers and channel partners a full range of training and certification options. The purpose of these training services is to educate and train the attendees with an in-dept understanding of the security products and solutions. Additionally, this training should prepare the attendees are hands-on with the latest technology, updates so that they become more competent in all technical aspects.

- Product System Administration Training
- Certification Training
- Specialize IT Security & Soft-Skill Trainings (CISA/CISSP/CISM/ISO27001)

Professional Services

Secure Source has a team of engineers with ample experience in implementing and managing multi-platforms networking environment. Our engineers are well-trained in various aspects of security products.

In addition, Secure Source has a comprehensive nationwide coverage of on-site support. Support services delivery range from 24 x 7 x 4, to basic advance hardware replacement service. Services and supports can also be tailor-made base on customer needs and requirements.

Our Solutions and Services

Secure Source's Security solutions offer you a wide range of products and services that help you identify your current network weaknesses. Our services include;

- ◆ Security Audit
- ◆ Security Vulnerability Assessment
- ◆ Penetration Testing
- ◆ Security Reporting and Compliance
- ◆ Intrusion Prevention Systems
- ◆ Perimeter Defense
- ◆ Enterprise Anti Virus Solutions
- ◆ Network Security, Monitoring & Performance Management
- ◆ Email Security
- ◆ Data Loss Prevention
- ◆ Encryption
- ◆ Identity Management
- ◆ Web Application Security
- ◆ Web Content Filtering
- ◆ Wireless Security
- ◆ Database /File Security
- ◆ Core Network Services
- ◆ Network End-Point Security

Our Partners

Secure Source's partnership with our partners provides our clients access to the latest technologies, premier technical support, advanced training and product certification.

Core Products

SourceFire - Intelligent Cybersecurity Solutions For Enterprise

Leading provider of intelligence driven and network security solutions. Sourcefire network defense system (3D System) unifies intrusion and vulnerability management technologies to provide customers with superior, real-time, network security.

BT Diamond IP – IPAM Address Management

BT Diamond IP delivers powerful, comprehensive IP Address Management (IPAM) solutions encompassing: [IP Block and Subnet Management](#), [DHCP management](#) and [DNS management](#) including [DNSSEC management](#). BT Diamond IP IPAM solutions enable enterprises and service providers to dramatically improve their overall IT operational efficiencies and service levels by automating IPv4 and IPv6 address management with DHCP and DNS server configurations.

Core Products

Imperva – The Leader In Data Security

Imperva to protect their business applications and databases than any other vendor. SecureSphere Platform – **Database Security, Firewall Security, Web Application Security** provides full visibility into data usage, vulnerabilities and access rights and enables security, audit and risk professionals to improve data security and meet regulatory compliance mandates.

Proofpoint - The Leader in SaaS Email Security, Data Loss Prevention and Email Archiving Solutions

Proofpoint secures and improves enterprise email infrastructure with solutions for email security, archiving, encryption and data loss prevention.

Core Products

AlgoSec Firewall Operations and Security Risk Management Solutions

AlgoSec is the leading provider of Network Security Lifecycle Management and Firewall Operations and Security Risk Management solutions. AlgoSec is the leading enterprise solution for firewall, router and VPN security compliance, audit, change management, risk management, server IP migration and policy optimization

Allgress – Visualize the balance between business risk and IT Security

Allgress provides affordable software and professional services that enhance an organization's ability to see clearly the relationship between IT security and risk to the organization.

Core Products

Certes Networks Network Encryption & Data Protection Solutions

Certes Networks is the leader in developing scalable security solutions for high performance networks. Certes Networks provide advanced multi-layer encryption and policy and key management solutions for securing wide area networks, and enable secure connectivity to private and public clouds. Certes Networks helps organizations improve security, decrease risk, and reduce the cost of compliance with data privacy regulations while enabling high performance and secure connectivity to critical infrastructures in the branch office, data center or in the cloud.

NetScout – Network and Application Performance Management

NetScout Systems is the market leader in Unified Service Delivery Management solutions focused on assuring service delivery for the world's most demanding and complex service delivery environments and also optimizes the environment, simplifies service delivery and protects the user experience.

Core Products

Elfiq – Link Load Balancer Appliances For Business Continuity, Internet And WAN Redundancy

With customers in over 28 countries, Elfiq Networks is a technology leader in the field of link balancing, WAN management, network optimization and business continuity.

TriGeo SIM – Security Information Management

The industry's only solution that combines log management, real-time analysis, event correlation, endpoint security with USB-Defender, and proactive network defense – the result is unprecedented network visibility, insight and control.

Core Products

Silver Peak – Data Center class WAN Optimization

Founded in 2004, Silver Peak is a privately held company that improves backup, replication and recovery between data centers and facilitates branch office server and storage centralization by improving application performance across the Wide Area Network (WAN). The company's award winning appliances deliver exceptional performance improvements with unprecedented security and scalability across all enterprise applications, including data replication, backup, file transfers, email, web and real-time applications such as Citrix and VoIP.

ForeScout-Network Access Control (NAC) | Access Control | Network Security

ForeScout is a leading supplier of network security and policy compliance management solutions. Our self-contained network access control (NAC) appliance is easy to deploy because it requires no software, no agents, no hardware upgrades or reconfigurations. Within hours, ForeScout customers can see and control everything on their network—all devices, all operating systems, all applications, all users. Over 500 of the world's most secure enterprises and military installations rely on ForeScout to protect their networks, enforce endpoint security policies, and protect sensitive data.

Supporting Products

BlueCoat – WAN Optimization, Secure Web Gateway & Application Performance Monitoring

Blue Coat Application Delivery Network (ADN) Infrastructure solutions (**WAN Optimization, Application Performance Monitoring, Secure Web Gateway**) provides visibility to classify and prioritize applications, content and user access in real time, acceleration of internal, external and real-time applications across the distributed enterprise and security of people and information from malicious applications, content and intent.

IntruGuard – The Leading DDoS Solution

IntruGuard is a leading supplier of Network Behavior Analysis (NBA) Systems for e-tailers, webhosts, social networking sites, Service Providers and Enterprise Data Centers. These NBA systems provide granular real time network traffic visibility and provide automatic protection against targeted Distributed Denial of Service (DDoS) attacks. These systems are vital in network security infrastructure of any service provider or enterprise data center network to ensure smooth network operation, full legitimate use of bandwidth and improve network utilization.
