

IPAM Insights

Virtualization, private cloud and organic growth have all increased network complexity at an alarming rate. Due to these issues, the need for automation and up-to-date network and IP address information has never been greater.

Infoblox IPAM Insights is an extension to the Infoblox IP Address Management solution that further automates the collection and management of IP addresses and combines it with rich network details.

Features

- Automation and task delegations
- Network Troubleshooting
- Security

Benefits

- Increased reliability, enhanced security and reduce administration
- Automation of repetitive tasks
- Workflow and delegation
- Monitoring and reporting
