

Achieve High Quality User Experience

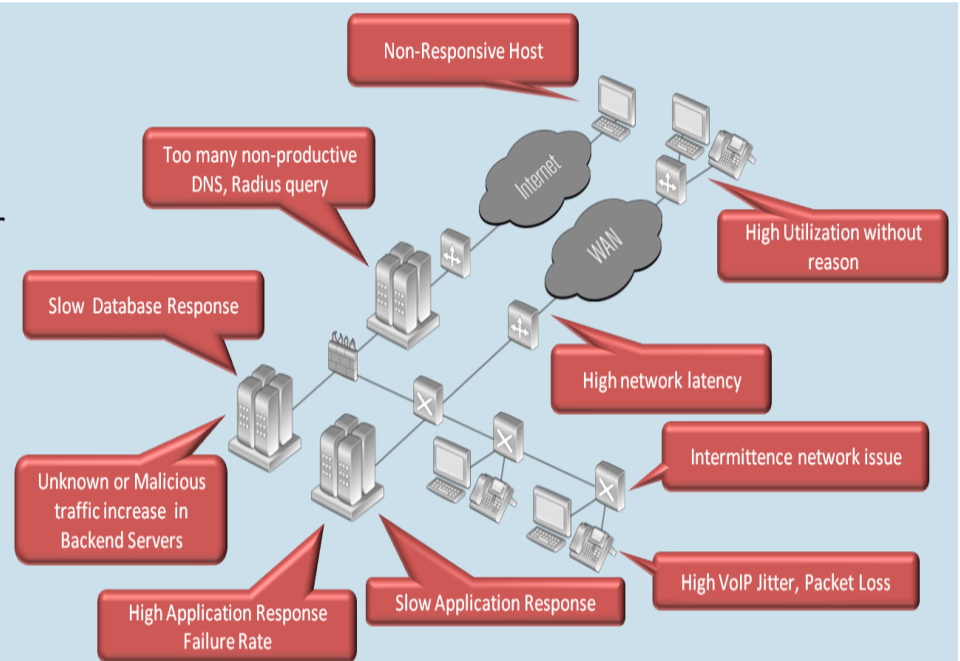

VISIBILITY

miss ^ like crazy

What are your challenges?

- **Users** always the first detect **network slow**
- Server & application team and network team **finger point** each other
- Don't know **when, what, why, who** was hogging the network
- **Bandwidth not enough** was always the answer
- **No concrete data** on what causes degradation yesterday
- Sudden surge of **Unknown Traffic** causing performance & security issues
- No idea what is the **User Experience KPI** Application Delivery
- **No Visibility** of what runs in the network

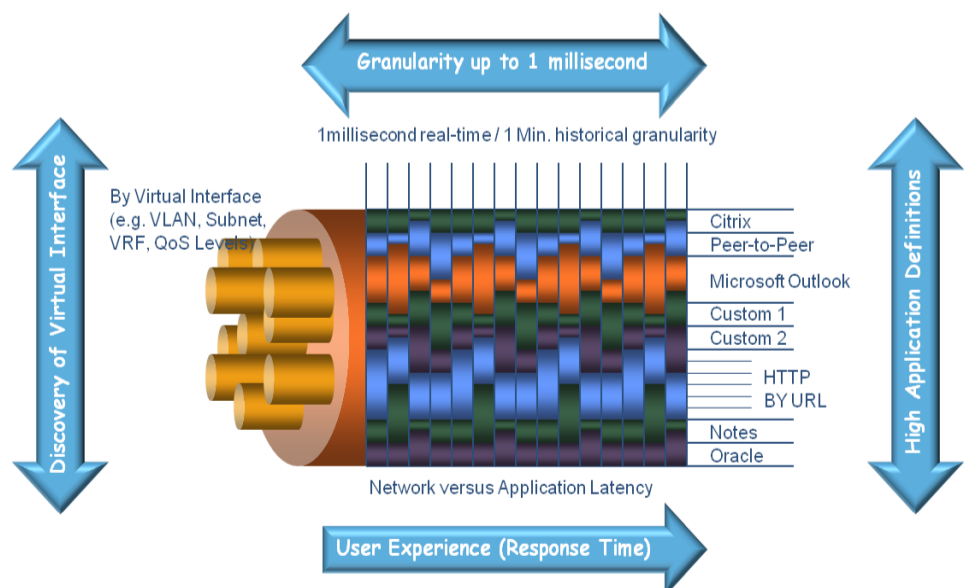

How NetScout Helps?

We understand the importance of high quality experience for your employees, customers and partners using any of the business services delivered over your enterprise infrastructure. NetScout® Systems offers solutions to give you a strategic view of those critical application service activities to optimize their performance and assure your users' experience.

With the nGenius® Service Assurance Solution from NetScout, a unified platform for a comprehensive view of end-to-end service delivery performance, you can:

- **Assure high-quality end-user experience**
- **Be proactive and prevent disruptions in application delivery**
- **Assure network, application and service delivery performance**
- **Plan infrastructure and bandwidth capacity accurately**
- **Simplify the complexity of service delivery management**

Packet Flow Technology has the ability providing traffic statistics, response time and packet capture for well-known, custom, complex, and web-based applications

Networks with HIGH DEFINITION Application Visibility
