## Announcement

### Secure Source Now Allgress Distributor

We're glad to bring you another product range from Allgress. Allgress provides affordable software and professional services that enhance an organization's ability to see clearly the relationship between IT security and risk to the organization. Allgress products and services allow CIOs and CISOs to better plan, analyze, manage, and communicate IT security, and to help business managers better understand the business risk inherent in every security decision as well as the security implications in every business decision. **For more information, please visit [www.allgress.com](http://www.allgress.com)**

## News

### **Securesphere DAM and SIEM Integration**

Many organizations own SIEM solutions and look to include management of database security notifications and audit records by their SIEM implementations. The integration between SecureSphere and SIEM solutions enables organizations to gain a comprehensive view of data usage, reduce impact on databases and applications, and provides advanced protection against emerging threats. The SecureSphere DAM and SIEM Integration Brief discusses the integration benefits.

## In the news

### 10 Building Blocks For Securing File Data

This whitepaper positions File Activity Monitoring and Data Loss Prevention (DLP) solutions. Imperva is partnering with DLP vendors, so the paper takes the approach of discussing when to deploy DLP with FAM, not whether to deploy DLP. We recommend a phased approach to securing file data, one that provides rapid time-to-results by using FAM first to tackle gaping holes in the data center, and using DLP to address remaining pockets of sensitive data and end points
