

## **Certes Networks Expands Presence in Malaysia with Secure Source Partnership**

*New partnership helps meet strong demand for data protection and encryption in Malaysia*

**Pittsburgh, PA, May 25, 2011**-Certes Networks, the leader in multi-layer encryption solutions for high performance networks, announced today that it has signed an agreement with Secure Source. Specializing in network security technology and solutions, Secure Source is known for delivering highly innovative and visionary solutions that meet the growing demand for security solutions in Malaysia and throughout the Asia Pacific region.

"As the need for scalable network security continues to grow, Certes Networks is expanding its reach into global markets through new partnerships with established regional VARs and Distributors." Thomas Gill, CEO of Certes Networks. "Secure Source provides us with a strong presence in Malaysia through a well-established and trusted partner."

With this partnership, Certes Networks' multi-layer encryption solutions are now available as a value-added security option within the Secure Source services portfolio. This offering enables security-sensitive clients to meet compliance and data protection requirements while retaining the high-quality service and support they have come to trust from Secure Source.

Certes Networks' innovative policy and key management solution and their multi-layer, wire-speed encryption appliances can secure any network without impacting the underlying infrastructure or application performance. This groundbreaking solution eliminates all of the tradeoffs that have traditionally accompanied network encryption, and allows organizations to follow the best practice of separating security and infrastructure management roles. The solution architecture also enables secure cloud migrations, allowing companies to adopt cloud networking at their own pace.

In order meet to meet the full range of deployment preferences, the Certes Networks solution will be offered both as a customer owned solution and as a managed Encryption as a Service (EaaS) offering.

### **About Certes Networks**

Certes Networks is the leader in multi-layer encryption solutions for high performance networks. The Company provides advanced encryption solutions for wide area networks, and enables secure connectivity to private and public clouds. Certes Networks helps organizations improve security, decrease risk, and reduce the cost of compliance while enabling high performance and secure connectivity to critical infrastructures.
