

Secure File Transfer

Proofpoint Secure File Transfer™ adds secure, easy-to-use large file transfer capabilities to an organization's Proofpoint deployment. It lets end users send large files quickly and easily while removing the impact of large attachments on your email infrastructure. Proofpoint Secure File Transfer enables increased user productivity and better management of email attachments.

Benefits of Proofpoint Secure File Transfer

- Lets business users securely send files and folders of any size—up to 20 gigabytes—just as easily as sending a small email attachment.
- Improves email system performance and reduces costs as large attachments no longer consume valuable email storage.
- Helps regulated organizations implement secure and auditable file transfer processes required by a variety of data protection and corporate governance regulations including Sarbanes-Oxley Section 404, HIPAA, 21 CFR Part 11, DOD 5015.2 and SEC rules.
- Can be deployed on-premises as a hardware or virtual appliance.

Hi,

Securely sending a large attachment via email is very easy with Proofpoint Secure File Transfer.

Thanks!
